DETAILED ACTION

Allowable Subject Matter

1. Claims 12-20 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of independent claims 12 and 14-17 is the claimed predefined criteria that is based on said predetermined first set of parameters. It is this limitation found in each of the claims, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.

The primary reason for the allowance of independent claim 13 is the claimed method steps of determining an empirical value associated with a transient phase of the technical process resulting from a modification of the predetermined set of parameters; and screening out the empirical value associated with the transient phase. It is these steps found in the claim, as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which make this claim allowable over the prior art.

The primary reason for the allowance of independent claim 18 is the claimed method step of screening out a class with fewer number of empirical values than a

Art Unit: 2863

predefined number. It is this limitation found in the claim, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

The primary reason for the allowance of independent claim 19 is the inclusion of the limitation that says: the result of said assessing step is a difference of the empirical value in the class with the predefined first threshold value. It is this limitation found in the claim, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

The primary reason for the allowance of independent claim 20 is the inclusion of the limitation that said predefined criteria in said division step is based on the predetermined set of parameters. It is this limitation found in the claim, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
